EXPERIENCE

LV.Net

June 2017 - Current

Full Stack Developer

- Designed and delivered a shift management system, saving the company 11 hours a day on managing employees shifts. The system efficiently handles shifts, regulates clock-in times and locations, and provides a streamlined time-off request system.
- Utilized the shift system and timecards to create an automated write up system, decreasing the amount of workplace violations by 85%.
- Collaborated with managers to transform field technicians' GPS data into accurate clock in and out times, alerts for tardy field technicians, and visualized the GPS data of each day using Google Maps API saving management 20-30 hours a week.

PROJECTS

- Modivibe – A Fan Made Spotify Experience
modivibe.com
- Personal Website
chrisrobles.dev
- Symfony 5 Cheat Sheet
